1. The damaged concrete road bridge in Swiecie Kolobrzskie (Schwedt-055/M03) over the Friedrichsthaler waterway is being dismantled preparatory to reconstruction. The work will take approximately two years to complete and will be carried out by the Rostock Building Union.
2. The road from the above bridge leads to the River Oder. Here the bridge originally had four spans, two of which were blown up during the war, and which were finally removed from the river to prevent hindrance to navigation. In the spring of 1953, on the Polish side of the Oder, preparations for rebuilding this bridge were observed.
